

# REACH FOR THE STARS

We are thrilled to announce that Ngai Yiu Tung Johnson, a current Secondary 6 graduate, has been selected to participate in the "Young Astronaut Training Camp 2023"! This is an incredible opportunity for him to receive 8 days of training in Beijing and visit some of the most exceptional places in the world, including the National Astronomical Observatory, the Centre for Space Utilization of the Chinese Academy of Sciences, and the Cold Lake Mars Camp. Johnson is among the first group of students from Hong Kong to take part in this programme.

We are immensely proud of Johnson's achievement and fully committed to cultivating the diverse talents of each and every student, empowering them to reach their full potential as leaders who can make a positive impact in their communities, our country, and the wider world.

We wish Johnson all the best in this life-changing adventure and eagerly await his return to school. We look forward to hearing about his remarkable experience and encourage his fellow schoolmates to pursue their passions and reach for the stars!
